

Let's Celebrate

Media Arts Topic- Term 4, 2020

Teacher: Sarah Robertson

ACARA:

- Plan, create and present media artworks for specific purposes with awareness of responsible media practice
- Investigate and devise representations of people in their community, including themselves,

TASKS:

- Use media platforms such as YouTube, BTN and Scootle to research about what is a Celebration.. Hopefully children will share details about celebrations specific to their culture.
- Children will be immersed with fiction & non-fiction texts about celebrations.
- Use different apps to produce either a Claymation, StopMotion or green screen technology to produce a clip/short movie that educates others about a celebration.
- A big focus this term will be on green screen technology and how it is regularly used for example on a news/weather set. Children might like to use the format as a news set to present the research about Celebrations.
- Use Music Apps, such as Incredibox & Garage Band to compose songs/music that you could use for a celebration.
- Children will also be encouraged to make a digital poster or comic strip that depicts something that they are proud about of themselves. We will celebrate our achievements and the posters can be consolidated into a short movie to be played at an assembly.
