

Literacy

Room 5 literacy will be taught between 8:45 – 11:00 am. It is important students arrive at school on time each day so they can familiarize themselves with the routine and don't miss out on important learning. Students will participate in grammar, spelling, handwriting, guided reading, and writing lessons. The writing topic for Term 1 is Procedural Texts. Students will be introduced to the purpose, structure and language features of instructions and recipes. They will participate in lessons to build their writing skills and write and publish their own simple recipe.

Students will participate in daily reading through D.E.A.R and guided reading groups, in which they will practice specific skills and work towards achieving their independent reading goals.

Library Borrowing

Our library borrowing day is **Wednesday**. This is part of our learning program in Room 5, and it is expected that all students participate in library borrowing each week.

Maths

The learning focus for maths this term is number and place value. Students will learn to identify, sequence and represent 2, 3 and 4 digit numbers. They will participate in daily activities to build upon their number knowledge, including ordering, sequencing, skip counting and problem solving. Students will develop their understanding of how multi-digit numbers can be partitioned and how numbers are placed on a number line. We will also cover some financial mathematics later in the term, and students will learn to recognize and add small collections of coins and notes, as well as calculate change.

Homework 10 minutes nightly reading practice is **strongly encouraged**. Your child may also require support with other learning tasks from time to time e.g. sight words (reading and/or spelling)

HASS

Students will investigate the natural and man made features of Australia and investigate Australia's states, territories and capital cities.

Technology

Students will investigate the role that technology plays in occupations within the community. They will identify and explore the need for technology within the community, and the positive ways in which technology can change lives.

Science In Science, Earth & Space is the topic for this term and the students will learn about the movement of Earth, the moon, and the sun to suggest explanations for everyday observational changes.

Health Child protection Curriculum: Focus Area 1 – The Right to be Safe. Wellbeing – Setting Up For Success

Hat Policy

Hats are required during outdoor play **all year round**. Students without a hat will be required to sit under one of the shelter sheds during lunch and recess. School hats are available for purchase from the front office.

Bell times

If students arrive before 8:40 they are required to stay in the supervised play areas until the first bell.

8:40 – Students enter classrooms
8:45 – Lesson 1
9:35 – Lesson 2
10:25 – Recess
10:55 – Lesson 3
11:55 – Lesson 4
12:45 – Lunch eating
12:55 – Lunch Play
1:25 – Lesson 5
2:15 – Lesson 6

Please notify the office if your child is away by 8:45 am so their absence can be recorded correctly on our school attendance system.
